C-PROGRAMS WEEK2

PROGRAM 1

CODE

```c
#include<stdio.h>

int main()
{
        int roll,m1,m2,m3,m4,m5;
        float total,avg;

        printf("Enter UR roll NO. here: \n");
        scanf("%d",&roll);

        printf("Enter 5 subject marks here: \n");
        scanf("%d",&m1);
        scanf("%d",&m2);
        scanf("%d",&m3);
        scanf("%d",&m4);
        scanf("%d",&m5);

        total=(m1+m2+m3+m4+m5);

        avg=total/5;

        printf("The total marks is: %.2f\n",total);

        printf("The average marks is: %.2f\n",avg);

        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog1
Enter UR roll NO. here:
950
Enter 5 subject marks here:
98
96
95
45
67
The total marks is: 401.00
The average marks is: 80.20
```

PROGRAM 2

CODE

```c
#include<stdio.h>

int main()
{

        float nou,cpu,total;

        printf("Enter the no. of units consumed: \n");
        scanf("%f",&nou);

        printf("Enter the cost per unit : \n");
        scanf("%f",&cpu);

        total=nou*cpu;
        printf("The total electricity bill amt. is: %.2f\n",total);

        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog2
Enter the no. of units consumed:
250.45
Enter the cost per unit :
6.56
The total electricity bill amt. is: 1642.95
```

PROGRAM 3

CODE

```c
#include<stdio.h>

int main()
{

        int empid,salary;
        float hra,da,gross;
        printf("Enter UR employee id here: \n");
        scanf("%d",&empid);

        printf("Enter UR basic salary here: \n");
        scanf("%d",&salary);

        hra=0.2*salary;
        da=0.15*salary;
        gross=salary+hra+da;

        printf("The HRA is: %.2f\n",hra);
        printf("The DA is: %.2f\n",da);
        printf("The Gross is: %.2f\n",gross);

        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog3
Enter UR employee id here:
950
Enter UR basic salary here:
250000
The HRA is: 50000.00
The DA is: 37500.00
The Gross is: 337500.00
```

PROGRAM 4

CODE

```c
#include<stdio.h>

int main()
{

        int noc,ppc;
        float service,total1,total;

        printf("Enter the number of coffee's here: \n");
        scanf("%d",&noc);

        printf("Enter the price per coffee here: \n");
        scanf("%d",&ppc);

        total1=noc*ppc;
        service=0.05*total1;
        total=total1+service;

        printf("The total amount without service fee is: %.2f\n",total1);
        printf("The service amount is: %.2f\n",service);
        printf("The total amount with the service fee is: %.2f\n",total);
        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog4
Enter the number of coffee's here:
4
Enter the price per coffee here:
250.5
The total amount without service fee is: 1000.00
The service amount is: 50.00
The total amount with the service fee is: 1050.00
```

PROGRAM 5

CODE

```c
#include<stdio.h>

int main()
{

        float dist,milage,cpl,tfuelreq,tfuelcost;

        printf("Enter the total distance to travel in the trip in KM: \n");
        scanf("%f",&dist);

        printf("Enter the milage of the vehicle taken to trip: \n");
        scanf("%f",&milage);

        printf("Enter the cost of fuel per Litre: \n");
        scanf("%f",&cpl);

        tfuelreq=dist/milage;
        tfuelcost=tfuelreq*cpl;

        printf("The total fuel required throughout the trip is: %.2f\n",tfuelreq);
        printf("The total cost fuel throughout the trip is: %.2f\n",tfuelcost);

        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog5
Enter the total distance to travel in the trip in KM:
450
Enter the milage of the vehicle taken to trip:
25
Enter the cost of fuel per Litre:
96.5
The total fuel required throughout the trip is: 18.00
The total cost fuel throughout the trip is: 1737.00
```

CODE

```c
include<stdio.h>

nt main()

        int flag,flag1=0;
        float balance=0,accdep,accwit;

        printf("Enter the initial balance of ur account: \n");
        scanf("%f",&balance);

        while(flag1==0)
        {printf("Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the transaction!!!!!: \n");
        scanf("%d",&flag);
                if(flag==1)
                {       printf("Enter the amount U wanna withdraw from ur account: \n");
                        scanf("%f",&accwit);

                        if(accwit<balance)
                        {

                                balance=balance-accwit;
                                printf("Your Balance is : %.2f\n",balance);

                        }
                        else
                        {
                                printf("Bro UR balance is %f Enter a Valid amount dude!!!!: \n",balance);
                                scanf("%d",&accwit);
                        }
                }
                else if(flag==2)
                {
                        printf("Enter the amount U wanna deposit in UR bank account: \n");
                        scanf("%f",&accdep);
                        balance=balance+accdep;
                        printf("Your Balance is : %.2f\n",balance);

                }
                else if(flag==3)
                {
                        flag1=1;

                }
                else
                {
                        printf("Bro are u for real just follow the instructions: \n");

                }

        }
printf("Your all Transaction have been successfully completed Thank u for choosing us Have a nice day !!! :) \n");
printf("Your Final balance in ur account is : %.2f\n",balance);
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog6
Enter the initial balance of ur account:
49000
Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the tra
1
Enter the amount U wanna withdraw from ur account:
1234
Your Balance is : 47766.00
Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the tra
1
Enter the amount U wanna withdraw from ur account:
647598
Bro UR balance is 47766.000000 Enter a Valid amount dude!!!!:
2345
Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the tra
2
Enter the amount U wanna deposit in UR bank account:
76589
Your Balance is : 124355.00
Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the tra
5
Bro are u for real just follow the instructions:
Enter 1 for withdrawing money , 2 for depositing money and 3 for ending the tra
3
Your all Transaction have been successfully completed Thank u for choosing us
Your Final balance in ur account is : 124355.00
```

PROGRAM 7

CODE

```c
#include<stdio.h>

int main()
{

        float pi=3.142,volume,r,h;

        printf("The pi value is : %.3f\n",pi);

        printf("Enter the Radius of the cone here: \n");
        scanf("%f",&r);

        printf("Enter the height of the cone here: \n");
        scanf("%f",&h);

        volume=(1./3)*pi*r*r*h;
        printf("The Volume of the Cone is: %.2f\n",volume);
        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog7
The pi value is : 3.142
Enter the Radius of the cone here:
45.65
Enter the height of the cone here:
23.54
The Volume of the Cone is: 51377.50
```

PROGRAM 8

CODE

```c
#include<stdio.h>

int main()
{

        int flag;
        float c,f;

        printf("Enter 1 for farenheit convertor and 2 for celsius convertor: \n");
        scanf("%d",&flag);

        if(flag==1)
        {
                printf("Enter the temperature in celsius here: \n");
                scanf("%f",&c);

                f=c*1.8+32;
                printf("The celsius converted to farenheit is: %f\n",f);
        }
        else if(flag==2)
        {
                printf("Enter the temperature in farenheit here: \n");
                scanf("%f",&f);

                c=(f-32)*0.55;
                printf("The farenheit converted to celsius is: %f\n",c);
        }
        else
        {
                printf("Enter a valid number 1 or 2!!!");
        }

        return 0;

}
```

OUTPUT

```
C:\Users\student\Desktop\c prog chethan>prog8
Enter 1 for farenheit convertor and 2 for celsius convertor:
1
Enter the temperature in celsius here:
27
The celsius converted to farenheit is: 80.599998

C:\Users\student\Desktop\c prog chethan>prog8
Enter 1 for farenheit convertor and 2 for celsius convertor:
2
Enter the temperature in farenheit here:
273
The farenheit converted to celsius is: 132.550003
```
